MSL-2

STS 61-C

This emblem represents the Materials Science Laboratory (MSL) -2 payload which flew on STS 61-C launched January 12, 1986. This first flight of the MSL carrier system was an important contribution to the flight certification of that system which is now available to support future requirements, and to the conduct of materials experiment operations.

MSL-2 carried the following materials processing experiments:
 Automated Directional Solidification Furnace (ADSF) II
 Electromagnetic Levitator (EML)
 Three Axis Acoustic Levitator (3AAL)

PRESENTED TO

Von L. Burton

Marshall Space Flight Center

OAST-1 STS 41-D (14)

This payload emblem was flown with the Office of Aeronautics and Space Technology (OAST) payload 1 which was dedicated to solar array, solar cell, and large space structures technology demonstrations and investigations. OAST-1 was carried to orbit on August 29, 1984, on Space Transportation System flight 41-D (14). The OAST-1 instrumentation development, payload mission, and supporting effort was highly successful, and made an important contribution to the availability of this technology for future space-flight activities.

PRESENTED TO

Von E. Burton, Jr.

In recognition for your significant contribution to the success of the OAST-1 payload mission.
